

THE SEARCH IS OVER.

You've finally found the right OCR product: Symphony OCR.

A document management system is a great solution for your firm, but did you know the full text search functionality only works on files that are text-based? By combining Symphony OCR with your document management system, you'll be assured ALL of your documents will be text searchable and at your fingertips in seconds.

That's why Trumpet has created the only product that automatically makes these pesky files text-searchable by any key word or phrase – regardless of how it was saved or when it was saved.

FIND DOCUMENTS

Use any keyword or phrase to search every file and always find the files you need.

FORGET THE FORMAT

It doesn't matter where your documents come from – e-mail, e-mail attachments, efax, scanner, USB drive – as long as they are in your document repository, they are automatically OCR'd.

PRESERVE CONTENT

OCR does not impact the original file; it preserves PDF annotations, Bates numbers, bookmarks, and other formatting.

SAVE TIME

Since files are automatically processed, you're free to focus on other tasks. What will you accomplish with a little extra time in your day?

THE POWER OF SYMPHONY OCR

- ➔ OCR stands for Optical Character Recognition.
- ➔ Makes all image-based documents text searchable.
- ➔ Allows you to select, copy and paste text.
- ➔ Automatically OCRs documents once they are saved.
- ➔ Continually checks for new documents to be OCR'd.
- ➔ Symphony OCR is powered by ABBYY FineReader® OCR engine.

The search is over. Symphony OCR is here sales@trumpetinc.com
